RAZOR

- Edge-lit LED illumination
- Ultra slim modern design
- Even light distribution
- Easy open snap frame to change poster
- Low energy consumption
- CE certified
- Single or double sided
- RAL colour finishes available

The Razor LED light box is the ultimate ultra slim light box for illuminated promotional display graphics, with all-round superiority over comparable products. It is manufactured to the highest quality within Europe (CE certified) using top grade aluminium, pure edge-lit acrylic and branded electrical components; including long life, high brightness, energy efficient LEDs offering higher brightness and more even light distribution.

At only 26mm deep single sided (39mm deep double sided), Razor LED light boxes are so slim line they are essentially illuminated poster frames. Razor light boxes have a 32mm aluminium snap frame on the front for quick and easy front loading graphic change.

There are three snap frame options: classic profile, flat profile and tamper proof which comes with an opening tool for security. The aluminium snap frames come in a silver anodised finish as standard or can be powder coated to a choice of RAL colours.

Razor light boxes are available in standard poster sizes or can be custom made up to the billboard poster size of 6 sheet (1800 x 1200mm)
