## TITAN

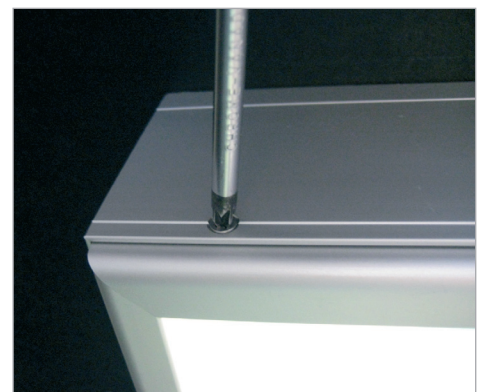

- Indoor / outdoor use
- IP55 rated (weather resistant)
- Single or double sided
- RAL colour finishes available
- Cost effective
- High quality finish

Titan backlit light boxes are traditional illuminated signs made from high quality aluminium profiles making them very robust and durable. They are often used for shop fascia signs and can be supplied with a wall bracket making them perfect for projection signs too. Made for indoor or outdoor use, they have a good level of weather resistance with an IP55 rating. The profiles come in a silver anodised finish as standard or they can be powder coated in a range of RAL colours.

Titan light boxes are supplied with either two acrylic front panels, one opal diffuser panel and one anti glare panel, to sandwich a print between; or just one acrylic opal diffuser panel for applying self-adhesive vinyl graphics. The graphics and acrylic panels are kept securely in place by bezels which are screw fixed into position. To change the graphics these are simply unscrewed allowing the panels and graphics to slide out.

The Titan light box is available in standard poster sizes including: A3, A2, A1, A0, 20" x 30", 30" x 40" and 40" x 60" or can be custom made to your specific size requirements. The light box comes in three depths; the Titan Classic light box is just 90mm deep single sided, the Titan Projector is 115mm deep double-sided and the Titan Dualcase light box is 168mm deep single sided and 176mm deep double sided, the depth depends on size and application.
