

NEW PRODUCT - 3D LED Light Box

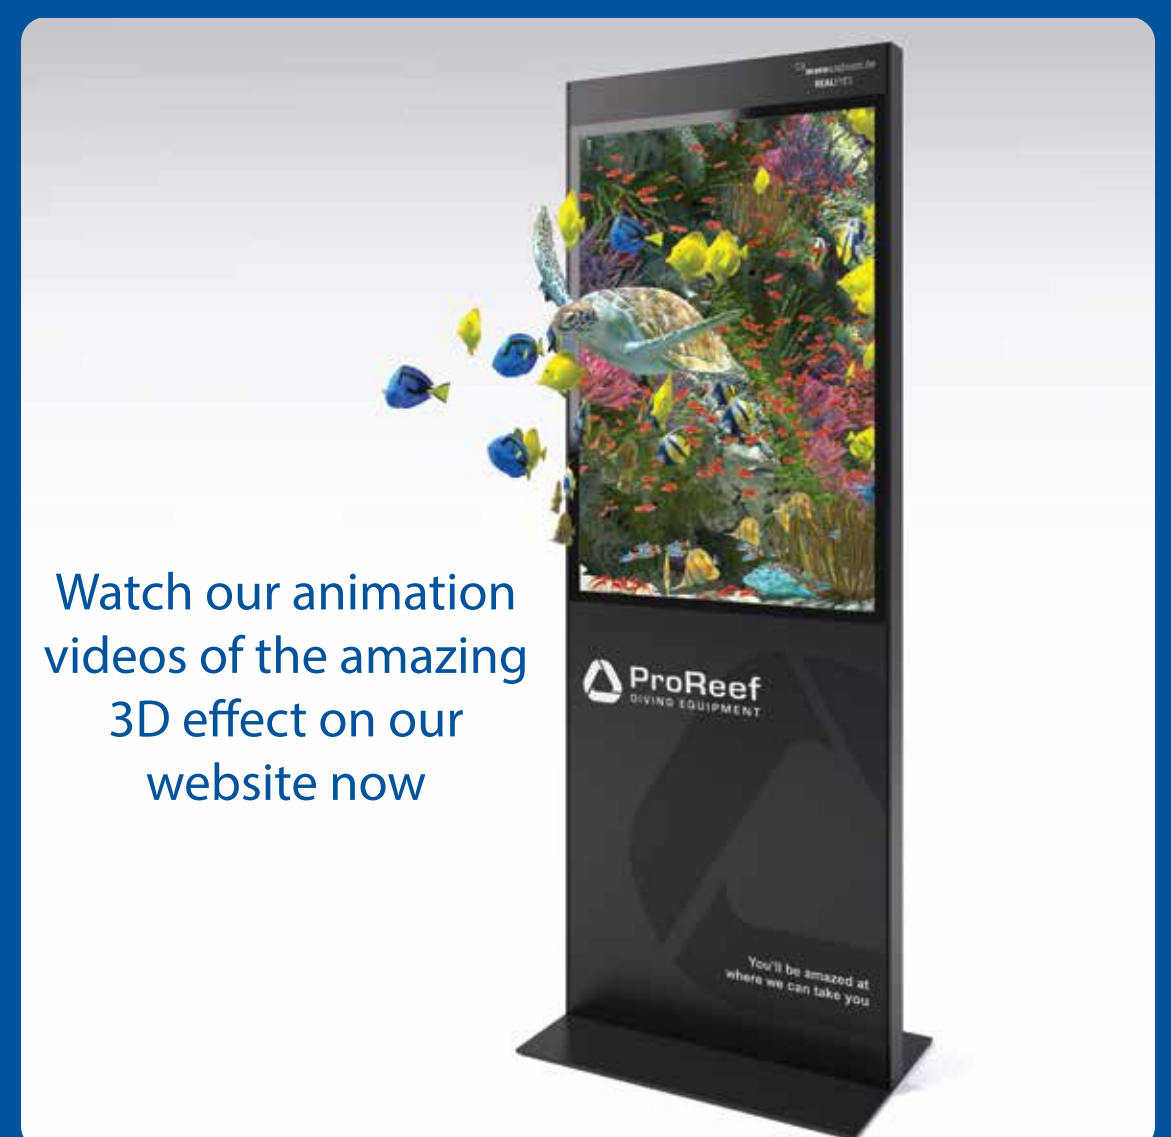

- 3D depth perception to infinity!
- No 3D glasses required to view!
- Super bright backlit LED lightbox
- Wall mounted or Freestanding
- Patented micro lens technology
- Images made up from 250,000 pictures
- Can be tiled to create larger sizes

It has to be seen to be believed!

Brand new 3D lightboxes are the most amazing attention grabbing advertising medium imaginable, customers will flock around the display completely entranced by the remarkable 3D effect!

Small steps to the sides and up and down allow the viewer to fully immerse themselves in the 3D image and capture different viewing angles to amazing effect without the need of 3D glasses!

The innovative technology uses a unique form of 3D imaging where objects have such incredible depth that they appear to physically float in front of the screen so viewers believe they can actually grab the objects they see!
